## AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Fax: 7043654851

## Listing of Claims:

- 1. (Currently Amended) A <u>calendered</u> plastics film composed of rigid polyvinyl chloride as backing film for a single- or multilayer, adhesive-bondable sleeve label which can be applied by adhesive bonding and shrinking onto a peripheral surface of a cylindrical body, wherein the plastics film <u>has a width up to about 2010 mm</u>, has been stretched <u>at temperatures of from 180 to 60 °C</u> in the machine direction of a calender, and has a positive heat shrinkage of from 40 to 60 % <u>in that direction of the plastics film running parallel to the machine direction of the calendar, as measured over a period of about 15 minutes at a temperature of from about 115 to 125 C.</u>
- 2. (Currently Amended) The plastics film as claimed in claim 1, wherein perpendicularly to the machine direction of the calender the negative heat shrinkage of the plastics film is from 0 to 10 %, as measured over a period of about 15 minutes at a temperature of from about 115 ° to 125 °C.
- 3. (Original) The plastics film as claimed in claim 1, wherein perpendicularly to the machine direction of the calender the plastics film has a positive heat shrinkage of from about 0 to 2 %.
- 4. (Canceled) Please cancel Claim 4.
- 5. (Original) The plastics film as claimed in claim 1, wherein the heat-stretching value for the plastics film perpendicularly to the machine direction of the calender is about zero.

Application No.: 10/791,938 Filing Date: March 3, 2004 Page: 3

- (Canceled) Please cancel Claim 6. б.
- 7. (Original) The plastics film as claimed in claim 1, whose thickness is from about 22.5 to бб µт.
- 8. (Canceled) Please cancel claim 8.
- 9. (Original) The plastics film as claimed in claim 1, wherein the number of holes with a diameter of from about 2 to 6 mm is smaller than or equal to about ten per 1 000 m<sup>2</sup> of film surface.
- 10. (Original) The plastics film as claimed in claim 1, wherein the number of holes with a diameter of from greater than 6 to 50 mm is smaller than or equal to about five per 1 000 m<sup>2</sup> of film surface.
- (Original) The plastics film as claimed in claim 1, which has been calendered and 11. stretched longitudinally, that is in the machine direction of a calender, and which has been transversely set during the longitudinal stretching.
- 12. (Original) The plastics film as claimed in claim 1, which is glass-clear.
- (Original) The plastics film as claimed in claim 1, which has been colored white. 13.
- 14. (Original) The plastics film as claimed in claim 1, which comprises a lubricant for improving its processability.
- (Original) The plastics film as claimed in claim 11, whose upper or lower side comprises 15. a metallizing layer composed of aluminum or of another metal or of a metal alloy, said metal or metal alloy selected from the group copper, brass, bronze and alloys thereof.

- 16. (Original) The plastics film as claimed in claim 7, which is a monofilm whose thickness is about 50 or about 60  $\mu$ m, the thickness tolerance in each case being  $\pm$  10 %.
- 17. (Original) The plastics film as claimed in claim 7, whose thickness is about 25, about 35, or about 37 μm, wherein in each case a protective covering film composed of rigid polyvinyl chloride, with a thickness of about 25, about 20, and, respectively, from about 10 to 20 μm has been applied by lamination to the upper side of the plastics film.
- 18. (Canceled).
- 19. (Canceled).
- 20. (Canceled).
- 21. (Canceled).
